

# INAUGURAL EVENT

26 AUG 2024 – Cresta Oasis Hotel

# 5K-ⒶPITAL

Empowering Zimbabwe's Future Through Collective Action

*Create, Preserve and Multiply Wealth*

# What is 5K-APITAL

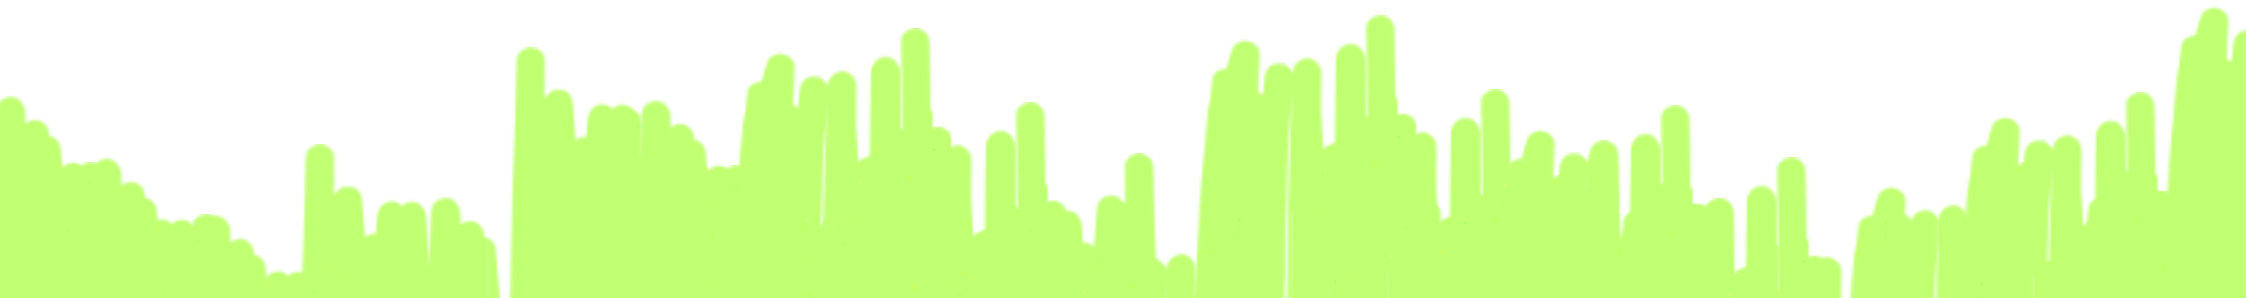

- The Zimbabwean funding landscape is notoriously centralized, limiting access for young entrepreneurs brimming with ideas but lacking the financial backing to bring them to life. The 5K-apital proposes a revolutionary solution: a people-powered fund built on the principles of decentralization, collective ownership, and youth empowerment.
- This fund is another arm of Dynamic Thought Leadership (DTL ) and its aim is to subsidise youth driven projects that are scalable to drive revenues , create employment and networks for its stakeholders.
- With an aim to decentralize and democratize the fund 5K-apital will be created and owned by 5000 ( five thousand ) youths who will contribute \$10 each and are able to take a long term view and delay gratification. These youths will have equity(shares) and voting rights in every projects 5K-apital invests in.

# Problems in the Zimbabwean funding industry

5X-CAPITAL

Empowering Zimbabwe's Future Through Collective Action

- **CENTRALIZED FUNDING** : Venture capitalists, hedge funds, and private equity firms hold the keys, creating barriers to entry for young Zimbabweans with innovative ideas.
- **LACK OF INFORMATION** : Young entrepreneurs struggle to find relevant funding opportunities and navigate cumbersome application processes
- **BIAS TOWARDS ESTABLISHED PLAYERS** :  
Existing funds often favor well-known individuals and established businesses, overlooking the potential of young, unproven talent.

# 5K-apital Solutions

01.

## Decentralized ownership

Every contributing youth becomes a fund co-owner, holding voting rights and equity in the fund's success.

02.

## Transparent Governance

A committee formed by representatives of the youths fund contributors will manage the fund, ensuring inclusivity and accountability.

03.

## Community-driven decision making

Project selection and fund allocation will be driven by youth input, prioritizing ideas with the potential to generate employment, networks, and opportunities for the entire community.

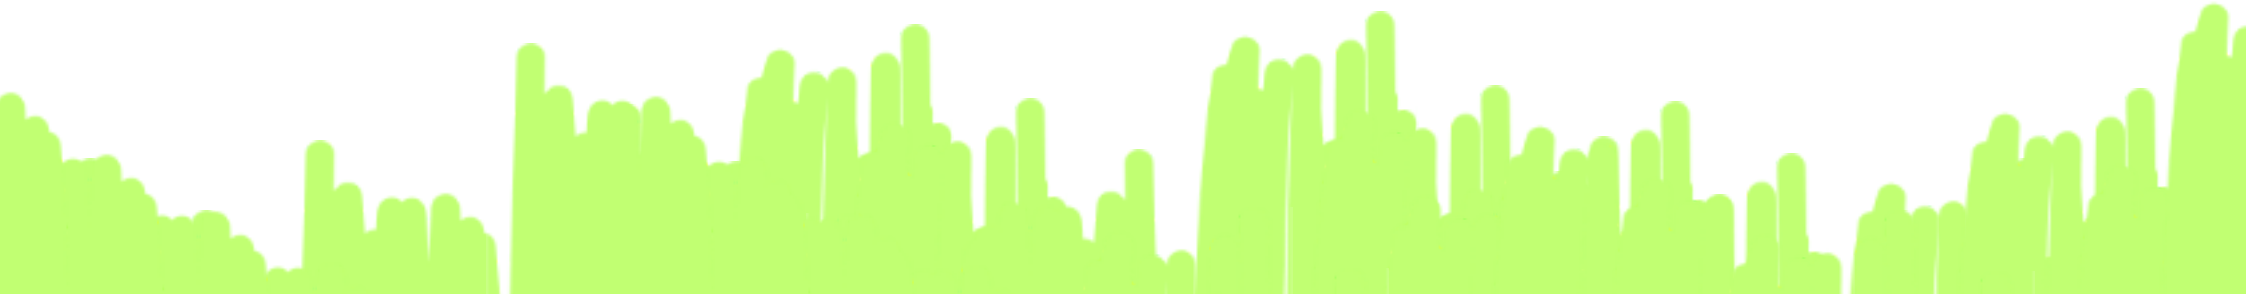

04.

## Scalable Contributions

Starting with a target of \$50,000 raised from 5,000 (five thousand ) youth pioneers contributing \$10 each, 5K-apital demonstrates the power of collective action and paves the way for future growth.

# Mission and Vision:

- We aspire to build a million dollar fund within 5 (five ) years making sure that youth projects take precedence
- 
- 5K-apital becomes a launchpad for innovative businesses, creating jobs and boosting the Zimbabwean economy.
- Mentorship programs, leadership events, and network-building initiatives equip young entrepreneurs with the tools they need to succeed.
- 5K-apital sets a precedent for decentralized funding, inspiring similar initiatives across Africa and beyond.

# Fund Management

- A committee created from the 5K pioneer contributors will have oversight on the decisions made by the fund.
- The fund will be hinged on the principle of transparency making sure that financial documents of all the investment portfolios under 5K-capital is disseminated to the 5K-capital community on a monthly basis.

# Pre-launch – January 2024

- The pre-launch of 5K-apital will begin in January 2024 stretching upto the inaugural event and this is aimed at creating an opportunity for early adopter youth contributors / investors who would like to lock in their spot since the fund is only open to 5000 ( five thousand ) youth pioneers.
- These pioneers will become co-owners and partners of the fund with equity and voting rights. They will be awarded with benefits which will include leadership serminars , workshops , training and annual local trips as well as scholarships , employment opportunities.
- Each contributor receives a unique ID containing their equity data, enabling secure access to fund benefits and fostering a sense of belonging starting from the inaugural event
-

# Tokenization of the fund: DE-FI ( Decentralized Finance )

- Immediately after the launch 5K-capital intends to tokenize the fund by moving it completely to the blockchain. We will launch the token that represents ownership through a private STO ( Security Token Offering ) and what that will do is it will allow the fund to increase its liquidity and to incentivize our investors /pioneers.
- It allows us to commonize and democratize ownership of certain financial securities that were once reserved for the rich to the common people.
- This idea makes fractional ownership possible.
- Everyone who participated in the pre-launch and contributed their 10\$ will receive their Security Tokens on this event. These tokens will represent their ownership in the fund.

# How It Works !

- We will mint 1 million Security Tokens
- 500,000 worthy of the tokens will be distributed amongst the 5K-capital pioneers : ( The Limited Partners ) Each pioneer receiving a total of 100 Security Tokens.
- The other 500,000 will be used to reward the team and to maintain the fund (The General Partners )
- These tokens will be liquid meaning each pioneer can choose to sell them to someone else for money and ownership will be transferred to that buyer.

# What Sets The Price Of These Security Tokens ?

- Since the fund will be worthy \$50,000 initially.
- 
- We divide the \$50,000/ with the total number of the minted Security Tokens which is 1 million tokens thereby giving us the total price of each token on the first STO (Security Token Offering) which means each token will be worth :
- 1 Security Token = \$0.05
-

# Putting things into perspective

- The aim of the fund is to increase the value of the fund's portfolio from the initial \$50,000. Through our investment strategy if hypothetically speaking we increase the fund's value from \$50,000 to \$1 million it sets the value of each Security Token to 1\$ and if we can increase that more the value of your stake increases as well.
- This means as we invest into the projects and maximizing the fund's asset value it increases the worth of each pioneers tokens.
- The Fund can also offer to buy back the tokens from pioneers who decide to sell.

# 5K-capital inaugural event

— 26 Aug 2024 | Cresta Oasis Hotel

## Inaugural Event

5k-capital plans to hold its inaugural event at the Cresta Oasis on the 26 of August 2024. This event will mark the official launch of the program. At this event we will host high networth individuals , key industry players , entrepreneurs , youth leaders in community development , journalists to mark the beginning of a democratized and decentralized youth owned fund.

The event will focus on the importance of funds in the financial markets and economic growth.

There will be keynote speeches , panel discussions and success stories , exhibitions and the honouring of the 5K pioneers.

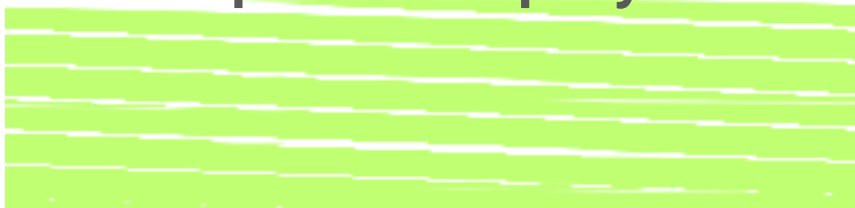

Empowering Zimbabwe's Future Through Collective Action
